(Note- Issued at the discretion of the Inspector)**

Permit Number _____ Effective Date: _____ Expiration Date: _____

911 Address: _____

Lot Number: _____ Subdivision: _____

Township: _____

Contractor Signature: _____

Electrical Contractor Signature: _____

Mechanical Contractor Signature: _____

Plumbing Contractor Signature: _____

(If applicable: Water to heat pump, Hydro-heat system, etc.)

PLEASE NOTE

Temporary electrical connection will be issued to assist contractors in completing the construction by providing electrical power to operate heating and air conditioning equipment for the purpose of maintaining and controlling environmental air to permit the proper installation of floor and wall covering.

In order for this structure to qualify for conditional power, the following conditions must be met.

1. The structure must be under roof and permanent exterior walls must be in place.
2. Service equipment must be installed and inspected.
3. Personnel to be alerted concerning the presence of energized electrical and heating system.
4. Inspection of the heating and air conditioning system must be made and approved.
5. Signature of approval from the electrical, mechanical, and plumbing contractors to energize specified portions of their systems. (See above)
